

Victorian Energy Upgrades

Lowering your
power bills

Cut your power bills
with Australia's
biggest energy
efficiency program

Victorian homes and businesses can cut their energy bills and carbon emissions through Victorian Energy Upgrades (VEU).

This Victorian Government program provides discounts on energy-efficient products and services. When you improve your energy efficiency, you use less power, so pay less on bills.

All Victorian households and most businesses¹ qualify for these discounts. Taking part is voluntary.

An average household saves \$110 on annual energy bills, mostly through lighting upgrades. Those who do more upgrades can save up to \$510 a year.

¹ Around 250 large energy users and some other businesses are currently exempt from the program. This means that they do not bear the pass-through costs of the program and cannot access the incentives.

What products and services are discounted?

For households, discounted energy efficient products include:

Lighting

Heating and cooling

Water heaters

Shower heads

Display of near real-time information on home energy use

Draught sealing

For businesses, discounted energy efficient products include:

Lighting

Water heaters

Refrigerated display cabinets

Motors

Heating and cooling systems

Larger businesses can also work with accredited businesses to tailor their energy efficiency upgrades.

How do I get these discounts?

1. The quickest and easiest way to start is by visiting the [Victorian Energy Upgrades website](http://www.victorianenergyupgrades.vic.gov.au).
2. Decide which discounted energy efficient product or service you want to upgrade.
3. Contact Victorian Energy Upgrades accredited businesses that sell the product or service you want. Shop around to find accredited businesses offering the best deals. VEU businesses are listed in this fact sheet.
4. Choose your product and the business will arrange installation – including the discount.

Good to know

- While this is a Victorian Government Program, accredited private businesses sell and install the discounted products.

Because they are private businesses, they decide which products they sell. So, you may not be able to buy all the items eligible for discounts in your area. The prices the businesses charge can also vary.

More information on [which businesses offer what discounted products](#) is available.

- Businesses involved in the program often contact potential customers to offer the discounts. They must clearly identify themselves and tell you the program is government-supported and voluntary.

Not happy with a product or service?

The Essential Services Commission oversees Victorian Energy Upgrades.

All VEU accredited businesses must follow Australian Consumer Law, including telemarketers and doorknockers.

If you have a complaint, you can [email the Essential Services Commission](#) or contact them at:

Level 8, 570 Bourke Street
Melbourne, VIC 3000
Phone: (03) 9032 1310

[More information is available online.](#)

Other Victorian Government programs cutting your energy costs

For households

- A \$1,000 rebate for [energy efficient reverse cycle split systems](#) is available from July 2021 for low income and vulnerable households.
- The Solar Homes Program offers [rebates for household solar](#) panels, solar batteries and solar hot water systems.
- Households with a Victorian electricity account, and a Pension Concession, JobSeeker, Austudy, Abstudy, or Youth Allowance recipient, can get a one-off [\\$250 Power Saving Bonus](#) until 31 January 2022.
- Save power and money by making your home more energy efficient through the [Residential Efficiency Scorecard program](#).

For small business

- Sustainability Victoria's [Small Business Energy Saver Program](#) offers \$2,000 payments for small businesses to upgrade equipment.
- The [Solar for Business Program](#) offers Victorian small businesses rebates to install solar panel systems.

Since 2009, the VEU program has:

- helped more than 1.9 million households and over 110,000 businesses upgrade appliances and equipment
- cut Victoria's greenhouse gas emissions by over 60 million tonnes
- saved Victoria \$4 billion in energy system costs.

It also supports 2,200 Victorian jobs a year.
